Education

Vellore Institute of Technology

Expected May 2027

Bachelor of Technology CSE (Cyber Security & Digital Forensics) GPA: 8.11

Internships

Airports Authority of India (AAI)

May 2026 – Jun 2026

Computer Science and Engineering Intern

New Delhi, India

- Engineered a Zero-Trust RBAC module with HMAC-SHA256 audit logging and biometric auth, achieving 100% event coverage and sub-500ms latency.
- Deployed an offline-first AI assistant via quantized LLM (Llama-3.2:1b) and ASR, delivering 100% operational capability with zero cloud dependency.

AICTE x ServiceNow

May 2026 – Jul 2026

ServiceNow Platform & AI Engineering Virtual Intern

Remote

- Automated ITSM test suites (ATF) for zero regression and orchestrated Agentic AI workflows via Flow Designer to eliminate manual multi-step processes.

Native (Vito India Advisor Pvt. Ltd.)

May 2025 – Jun 2025

Data Privacy & Compliance Assistant

New Delhi, India

- Managed secure access-control workflows for 5+ data categories, achieving 100% DPDP Act audit readiness.

The Red Users

Feb 2025 – Mar 2025

Cybersecurity Intern

Remote

- Executed penetration tests using Burp Suite and Nessus, resolving 15+ OWASP vulnerabilities and reducing the exploitable attack surface by 30%.

Deloitte, TCS, Amazon (Forage)

Apr 2025 – Jun 2025

Cybersecurity & Cloud Job Simulations

Remote

- Architected a scalable AWS Elastic Beanstalk infrastructure (40% faster response) and applied IAM frameworks to analyze 1,000+ sessions for network threats.

Projects

NetScanGo | Go (Golang), Goroutines, TCP/IP, Cobra

<https://tinyurl.com/5n8pxm8x>

- Engineered a high-concurrency TCP port scanner utilizing a worker pool model with 10,000 goroutines, successfully scanning 10,000 ports across a /24 subnet in under 12 seconds while maintaining a sub-30MB memory footprint.

AI Phishing & ARP Poisoning Detector | Python, JavaScript, Chrome APIs, Scapy

<https://tinyurl.com/294kb4ms>

- Shipped an ML-integrated browser extension achieving a 95% phishing detection rate, and engineered a Layer-2 network monitor flagging MAC spoofing within 2 seconds.

Intrusion Detection System (IDS) | Python, Network Protocols, Traffic Analysis

<https://tinyurl.com/55htc49f>

- Designed a signature-based IDS covering 20+ threat patterns with real-time alerting, driving a 35% reduction in simulated mean-time-to-detect.

Deepfake Detection - Medical Imaging | Python, PyTorch, ResNet18, EfficientNet

<https://tinyurl.com/3kppjac7>

- Built an adversarial-content detection pipeline achieving 92% accuracy, boosting performance by 18% through specialized preprocessing on medical imaging datasets.

Technical Skills

Languages: Python, Java

Databases: SQL, Relational Database Service (RDS)

Applied Technologies: React, Tailwind CSS, Flask, JavaScript, Chrome Extension APIs, Scapy, PyTorch, ResNet18, EfficientNet, OpenCV, YOLOv4, Twilio API, AWS, Oracle Cloud Infrastructure (OCI)

Security & Core Concepts: Zero-Trust Architecture, RBAC/IAM, Penetration Testing, OWASP Top 10, HMAC-SHA256, Digital Forensics
